LABELING

We label free with printed labels when requested, BUT ONLY WHEN REQUESTED.

PACKING

We pack free by a light and secure system which we believe is the best in use.

Plants are packed bare root. We do not ship planted pots or dishes.

SUBSTITUTIONS

Unless instructed, we use our judgment in the case of short items.

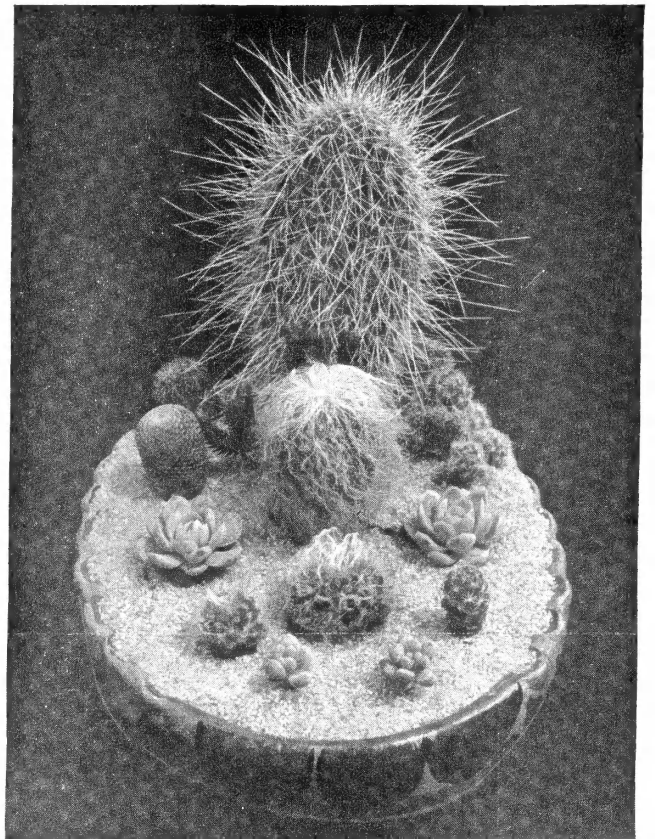

WE ARE WHOLESALE ONLY

and believe we are the only California shippers who absolutely refuse retail business.

OUR GUARANTEE

We guarantee safe arrival by Railway Express only. Parcel post and freight shipments travel at purchaser's risk for loss or damage en route. If plants should arrive in bad order, secure inspection report from delivering agency, and we will assist in making claim.

If upon opening shipment, any customer believes we have not shipped fair value and good quality, the entire shipment or portion should be returned to us at once by express collect.

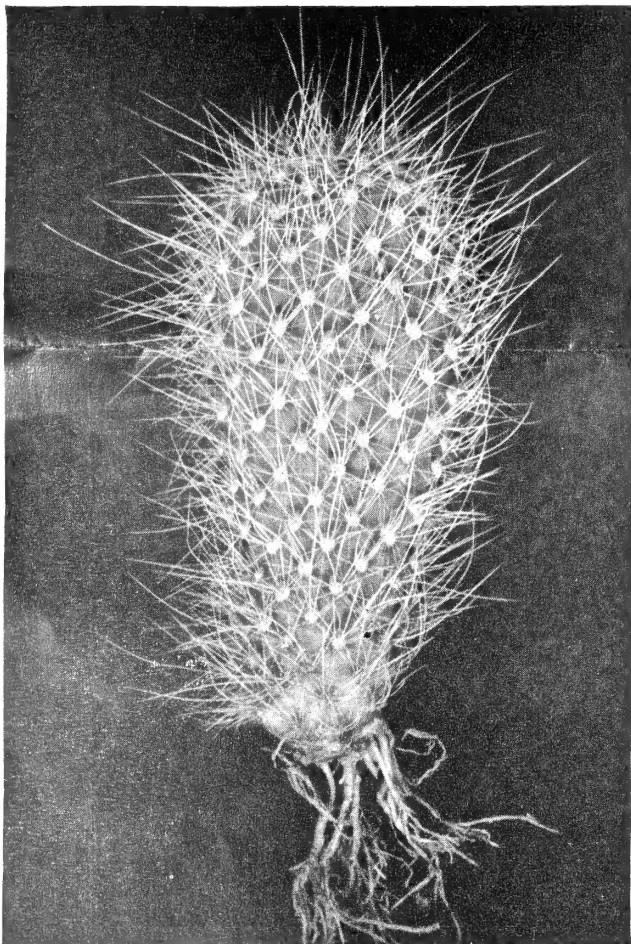

Mexican Dish Garden

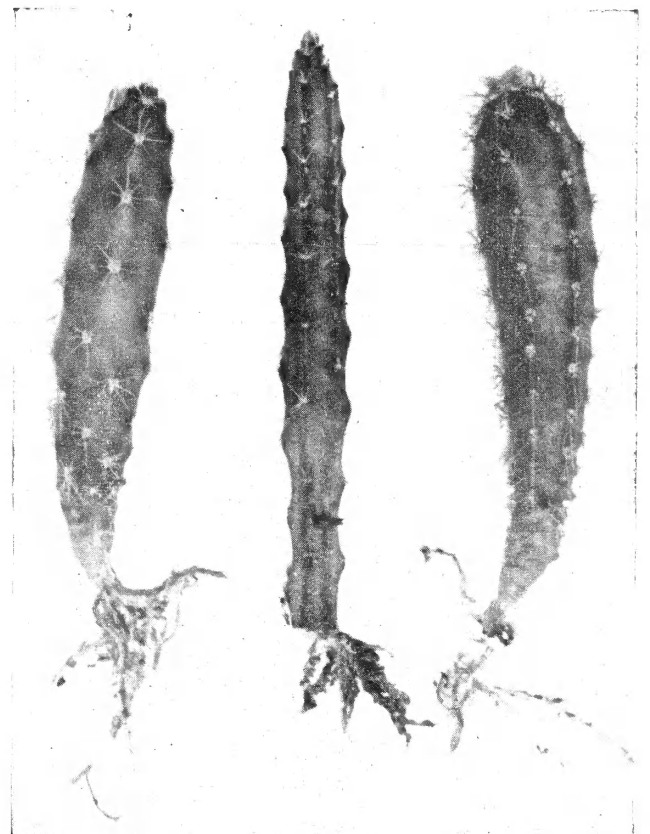

We will refund any money paid out for such stock and transportation.

Gates Cactus and Succulents

loaded with vigor . . . the most satisfactory.
It's not what you pay, but the value you get that counts.

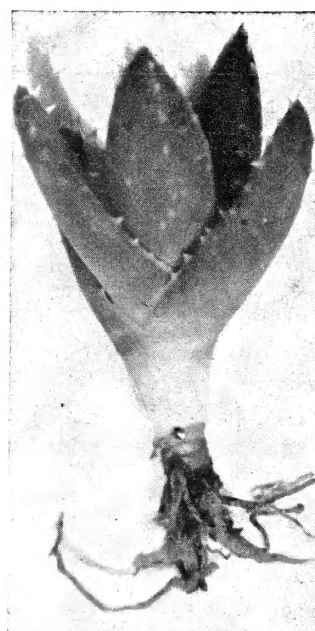

For color and sturdiness give cactus and succulents a maximum of light. Do not over water. Keep them on the "dry side."

California Grown Dish Garden Assortments

Cash in on the evergrowing demand for cactus and succulent plants by offering your customers nicely potted single plants and artistically arranged dish gardens. Use them to offset the shortage of Dutch and Japanese bulbs during the coming season. Their uses are countless.

Owing to special climatic advantages, Southern California has taken the lead in the production of nursery grown cactus, and a great group of useful and attractive succulent plants. After twelve years of experience in cactus and succulents, we have built up one of the largest, if not the largest, exclusively cactus and succulent nurseries in the country.

The assortments we ship are well-rooted, clean and healthy plants grown especially for the small pot plant and dish garden trade. We ship them bare root, properly and lightly packed, so that you may expect a hundred salable plants out of every hundred purchased. Good plants are worth good packing.

Our assortments are not "loaded" with junk. They are carefully selected kinds, in well-balanced assortments. We ship equal numbers of each kind that we include, in all assortments, except Dog Tail assortments. Those who buy in small lots and who are not thoroughly familiar with cactus and succulents, will find our assortments more useful than their own selections. We label free with printed labels upon request, but only when labeling is requested.

Gates Cactus Gardens from the Air

The above airplane view shows our fifteen-acre nursery only eighteen months after we purchased the land. It is located at 300 to 350 Hillside Avenue, in the Norco District, five miles northeast of Corona. This spot is just half way between the desert and the sea. It is warm and dry without the burning heat of the desert. After ten years' experience in the commercial culture of cactus and succulents, we chose this as one of the most promising locations. We have not been disappointed.

We are always glad to have you call and see how we grow the finest of stock. In the fields are long rows of well kept stock plants. In the flat yards and houses are somewhere around a million plants either ready for shipment or coming along rapidly. If you arrive by stage or train, just call Corona 626 and we will meet you.

GATES SAMPLERS

Owing to the great number of kinds we offer, we do not send out free samples. In order to show what the different kinds, sizes and prices are, we make up GATES SAMPLER ASSORTMENTS of all kinds and sizes in stock, ranging in price to 15c each, labeled with printed labels and priced per 100, packed F.O.B. Corona as follows: Cactus only \$3.00, Succulents only \$3.00, Cactus and Succulents combined \$5.50 NOTE:—No specified number of plants is promised, but Gates Samplers always give good value and on account of the cost of individual labeling a second Gates Sampler will not be shipped to a customer within ninety days from the previous shipment. The COMBINED GATES SAMPLER contains over a hundred plants.
